

ABS ECU

 REPAIR & REPLACEMENT

Anti-lock Braking System Electronic Control Units (ABS ECU's) are complex components that are vital to brake system performance. Not only do ABS ECUs control critical functions of the braking system, they are constantly sending, receiving, and storing incredible amounts of information. Detroit Reman's years of experience provides a high quality, thoroughly tested ABS ECU that was developed to restore reliable functionality.

FEATURES AND BENEFITS

- **Assured Quality Standards:** Rigorous inspection of every component after complete disassembly and cleaning. Ambient & hot tested to validate performance in simulated operating temperatures.
- **Industry Leading:** Original components or validated equivalents for cab and frame mounted models are used in the reassembly process. Industry leading processes establish customer confidence in product quality and reliability.
- **Nationwide Availability:** Proudly remanufactured in the USA and available at over 800 locations.
- **Warranty:** We stand behind our product with 1-year / unlimited miles.
- **Cost of Ownership:** A Reman option provides an economical choice while maintaining the same standards and functionality as Genuine.
- **Comprehensive Testing:** Functionally tested with the latest software and reset to original defaults. Voltage-tested to ensure proper readings at both elevated and reduced voltage levels. Internal drivers are load-tested to ensure they are functioning at full power. Sensor inputs are tested and driven through all operating ranges.
- **Cross References:** Reman part numbers cross referenced below to the Genuine part numbers for ordering ease and accuracy.
