## General Product Information

### Military Grade Plate Design

Made from 99% pure lead and built to stand up to the harshest environments. ODYSSEY batteries offer slower self-discharge, less corrosion and faster recharging.

### ODYSSEY® batteries vs. spiral wound designs

An ODYSSEY® battery's densely packed plates eliminate the dead space in "six-pack" AGM designs for more power.

## Additional Features and Benefits

- **Upgraded Brass Terminals** ensure secure, corrosion-free cable connections
- **99% Pure Lead Plates** are extremely thin, so more of them fit in the battery. More plates = more power
- **Robust Intercell Connections** are cast to the plates and bonded to resist vibration and eliminate internal sparking
- **Compressed AGM Plate Separators** deliver extreme vibration resistance and prevent spills, even when battery is installed on its side
