Product Highlights

40-CHANNEL CB RADIOS ARE STILL A PROFESSIONAL DRIVER 'MUST HAVE'

Citizens Band (CB) radios have long filled the role of allowing citizens to talk to other radio users nearby. Although there are many other communication options available today for both near and far field communication, CB radios have many advantages that make them a popular choice among professional drivers. CB radios are also popular among off-roaders, RV owners, and for motor coach applications. CBs are commonly used by professional drivers to stay in communication with one another and to provide alerts to each other about driving conditions — such as accidents, road construction, speed traps, adverse weather conditions, and traffic jams. CB radios offer a safe alternative to other communication mediums, while also acting as a faithful companion for the long distance driver.
